Welcome to Australia – Terry Bennetts

My new album 'A Fortunate Life' has just been released and 'Welcome to Australia' is the third single from the Album. It is a comedy song that had its beginnings when we travelled to Europe three years ago and we were constantly told by the Europeans that they wouldn't travel to Australia because every creature here wants to do you harm. They mentioned our deadly spiders, snakes, crocodiles, sharks etc which we have learned to live with so this little song was born from their fears. We decided to make this the latest release as the world could maybe use a bit of humour at the moment.
